OBJECTIVE

Developer position to leverage my experience and education to increase functionality, simplify the user experience, and provide practical training.

PROFESSIONAL EXPERIENCE

Oct 2009 – Present **Total Care** **Crowley, TX**
Web Developer

- Developed graphing reporting tools using jqPlot and jQuery.
- Created inventory system to track medical supplies with deep logging for auditing purposes.
- Implemented various scripts and processes to reduce paperwork and repetitive tasks in billing department.
- Created time clock and employee scheduling web application with modules for Human Resources.

Jul 2006 – Feb 2009 **Fielder Road Baptist Church** **Arlington, TX**
Web Developer

- Developed specialized plug-ins for church's WordPress sites, such as a fully customizable registration form and an interface to enter geo-coded locations tied to Google maps application.
- Developed web application to take online contributions and generate NACHA file for JPMorgan Chase.
- Created CMS that was extensible and incorporated legacy code through modules.
- Developed training and documentation for staff as new technology was implemented.

Sept 2004 – Oct 2005 **Directech Southwest** **Winnfield, LA**
Software Developer

- Maintained legacy code and improved functionality and performance of inventory and payroll systems.
- Merged code base of four forked inventory systems and performed stress testing.
- Performed server maintenance and handled support calls from technicians.

Oct 2003 – Sept 2004 **TreuTech** **Natchitoches, LA**
Owner

- Developed municipality ticket tracking and invoicing software.
- Designed web application for car dealers with full options menu with interest rates and loan periods.
- Performed hardware and operating system upgrades at all four branches of a local bank.

Jan 2001 – Oct 2003 **Space Science Group** **Natchitoches, LA**
Web Administrator

- Helped create standardized test preparation software for middle school students.
- Created web application to handle administrative duties for Camp Discovery.
- Produced graphics and digitized video clips for middle school science web site.
- Trained student workers and acted as student worker supervisor.
