## OBJECTIVE

Developer position to leverage my experience and education to increase functionality, simplify the user experience, and provide practical training.

## PROFESSIONAL EXPERIENCE

**Fielder Road Baptist Church**      Arlington, Texas      Jul 2006 – Feb 2009  
**Web Developer**

- Developed specialized plug-ins for church's WordPress sites, such as a fully customizable registration form and an interface to enter geo-coded locations tied to Google maps application.
- Developed web application to take online contributions and generate NACHA file for JPMorgan Chase.
- Created Content Management System that is extensible and incorporated legacy code through modules.
- Developed training and documentation for staff as new technology was implemented.

**Directech Southwest**      Winnfield, Louisiana      Sept 2004 – Oct 2005  
**Software Developer**

- Maintained legacy code base and improved functionality and performance of inventory and payroll systems.
- Merged code base of four forked inventory systems and performed stress testing.
- Performed server maintenance and handled support calls from technicians.

**TreuTech**      Natchitoches, Louisiana      Oct 2003 – Sept 2004  
**Owner**

- Developed municipality ticket tracking and invoicing software.
- Designed web application for car dealerships to give full options menu to car buyers based on interest rates and loan periods.
- Performed hardware and operating system upgrades at all four branches of a local bank.

**Space Science Group**      Natchitoches, Louisiana      Jan 2001 – Oct 2003  
**Web Administrator**

- Helped create standardized test preparation software for middle school students.
- Created web application to handle administrative duties for Camp Discovery.
- Produced graphics and digitized video clips for middle school science web site.
- Trained student workers and acted as student worker supervisor.
